The IDS's received 7/26/04 and 6/15/05 have been entered and claims 1-17, 19-51 are currently pending in this application. Prosecution has been reopened and rejections in all previous Office Actions are hereby withdrawn. Please inform the examiner of any related applications where 10/721,031 is a CIP of this application and 11/248,650 may also be related.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, 19-36, drawn to a calibrator or control solution.
- II. Claims 37-51, drawn to a method of making a calibrator or control solution.

The inventions are distinct, each from the other because:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method could be practiced by hand without the kit.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
